

FIREFORM

FABRICATION

Fireform Fabrication is the operating division of Winsor Fireform that designs and builds metal frames, both standard and custom, exhibit mounting systems and metal industrial artwork.

Fireform Fabrication offers a comprehensive line of standard frame systems such as those made famous by the National Park Service (NPS). In addition, Fireform Fabrication custom designs frames and mounting systems to fit any installation environment. For example, the frames pictured here were custom manufactured by Fireform Fabrication from customer-supplied concept drawings.

Fireform Fabrication works with a variety of materials including steel and aluminum as well as specialty materials such as corten weathering steel and stainless steel. In addition to a wide selection of base materials, Fireform Fabrication also offers a variety of finishes including: anodizing; sand-blasting and bead-blasting; powder-coating, in both standard and custom colors; and various brushed finishes.

To ensure quality and control lead-times all frames and mounting systems produced by Fireform Fabrication are manufactured in-house at Winsor Fireform's plant in Tumwater, WA. We enjoy creating, so please give us a call to discuss your project!

FIREFORM

FABRICATION

PROJECT NAME: Apollo Anniversary

LOCATION: Kennedy Space Center, FL

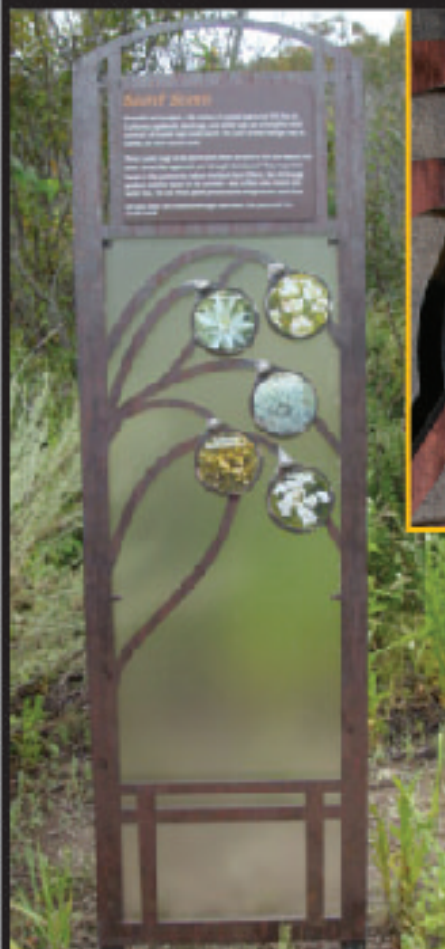

CLIENT: Kennedy Space Center

Winsor Fireform was asked to produce porcelain enamel panels and custom frames to commemorate the 40th anniversary of the first lunar landing. The quantity of 22 porcelain enamel panels are recreations of the front page from various newspapers around the world that covered the lunar landing. The custom frame displays were created by Fireform Fabrication from the client's general concept sketches.

PROJECT NAME: Mary's Trail

LOCATION: Laguna Coast Wilderness Park
Laguna Beach, CA

CLIENT: Laguna Canyon Foundation, OC Parks

ART DIRECTION & DESIGN: Laura Stahlberg & Emily Ivey
SoLa Creative
Laguna Beach, CA

INTERPRETIVE PLANNING & WRITING: Jenny Rigby
The Acorn Group
Laguna Beach, CA

The custom shaped frame displays were produced by Fireform Fabrication from Corten Weathering Steel. Fireform Fabrication worked with SoLa Creative to design the mechanical portions of the project, which included the hinging elements as shown above. Winsor Fireform fabricated the porcelain enamel portion of this project.

FIREFORM

FABRICATION

PROJECT NAME: Richmond Capital Trail

DESIGNER: Ralph Applebaum Associates, NY, NY

LOCATION: Richmond Riverfront Trail
Richmond, VA

Fireform Fabrication custom fabricated frames produced from 1/4" stainless steel plate, sand and bead blasted for a precise finish. The frames display 8 Winsor Fireform porcelain enamel exhibits as well as bronze sculptures.
